

Synergy Business Innovation & Solutions, Inc. (Synergy), your trusted Information Technology services partner.

- Synergy Innovation Lab to build technology driven solutions
- Successfully executed dozens of federal projects across 6 Cabinet-level departments
- 95% prime contracts
- 10+ years in business

CORE CAPABILITIES

DIGITAL TRANSFORMATION
Develop modernization roadmaps to re-engineer business processes and deliver faster and improved services through mobile and web applications

EMERGING TECHNOLOGIES
Enable adoption of emerging technologies like AI, ML, and RPA to automate legacy business processes and improve efficiency

CLOUD SOLUTIONS
Utilize commercial (AWS, Azure) and government-sponsored (Cloud One) cloud services to develop new and migrate legacy applications using Software factory (DevSecOps) pipeline

DATA ANALYTICS & VISUALIZATION
Develop multi-tenant data analytics platforms and provide data visualization using various technologies

SAAS & LOW-CODE/NO-CODE SOLUTIONS
Evaluate, implement, and migrate legacy applications and processes to platforms such as ServiceNow, Salesforce, and Appian

TECHNOLOGY INNOVATION
Synergy built a dynamic form-generation platform (CELERFORM) to develop complex form-based applications

CUSTOMER QUOTES

“...Thanks again for all you have done for the USAF—this has helped us considerably and I’ll see that your CPARS is reflective accordingly.”

- AF AQCI customer on Synergy using AF Platform One Certificate to Field (ATO) process to deploy the BCRT application on AF CloudOne in little over a month

“I wanted to express my appreciation to the DCOI team members working on the recent data center migration. During today’s call, the customer complimented how well the project plan has progressed since we first met with them two weeks ago.”

- DOL Federal Lead on a complex data center migration effort performed by Synergy

“...the sheer amount of work all of you have put into this effort in the three months since the start has me excited about the next phase of the project. This is a herculean effort for sure... thanks for everyone’s hard work.”

- USCG Federal Cybersecurity Lead on our STIG assessment and remediation effort for 50+ applications
