Staffing as a Service

Services are offered as a long term contract, contract to hire, and/or as a direct hire placement.

IT Infrastructure

Gridiron is focused on helping clients optimize, secure, and modernize their IT Infrastructure no matter where they are in their cloud/digital transformation journey. We provide consulting resources in key areas including data center, wireless, SD-WAN, SDN, SASE, and more.

Cyber & Cloud Security

Traditional security measures no longer address today's changing threats organizations face. Our team works with our clients to help deliver modern security solutions around security operations, identity & access management, incident response/threat intelligence/penetration testing, Zero Trust environments, and government risk & compliance.

Software Development

Gridiron specializes in the full life cycle: Requirements gathering, systems design, development, testing and implementation. Providing clients with full stack professionals that have extensive knowledge ranging from anything back-end, database to the front-end. i.e. Javascript, jQuery, Github, Angular, React, Java, Ruby, .Net Core, Docker, Kubernetes.

Enterprise Applications

Strategic investments to support enterprise applications separate us from the competition. We consistently hire, train, and deploy engineering & architecture resources to design, build, implement, and optimize cloud-based platforms including Salesforce, ServiceNow, AWS, Oracle, Google, and many more. We maintain top level partnerships and hold industry certifications with strategic partners.
