

DataRuck

POWERED BY NIGHTHAWK CYBER

Make Decisions at the Speed of Data

DataRuck is an AI-enabled, Data-as-a-Service (Daas) solution revolutionizing human wearable and IOT sensor data management.

DataRuck solves the challenge surrounding mobile and instrumentation sensor data collection and management, providing analysis and insights to consumers in **real time, on demand**.

- ✓ Consolidated and powerful data ecosystem
- ✓ Well formed data fabric for AI predictive analytics
- ✓ Designed for cArmy, FedRAMP deployment
- ✓ Proprietary process extracts, loads, transforms data into meaningful business intelligence
- ✓ Customized dashboards for senior leaders, program managers, and analyst
- ✓ Subscription and support tiers that meet customer needs

DataRuck Drives **Information Dominance** on the Battlefield and Beyond

Reliability & Consistency

DataRuck follows a bronze, silver, gold approach to data management. From raw data to refined and enriched data, DataRuck ensures that your data is reliable, consistent, and accessible for analysis and decision-making.

Security & Compliance

DataRuck is built to comply with NIST 800-53 security controls for full FedRAMP compliance. You can trust that your data is secure, whether in transit or at rest.

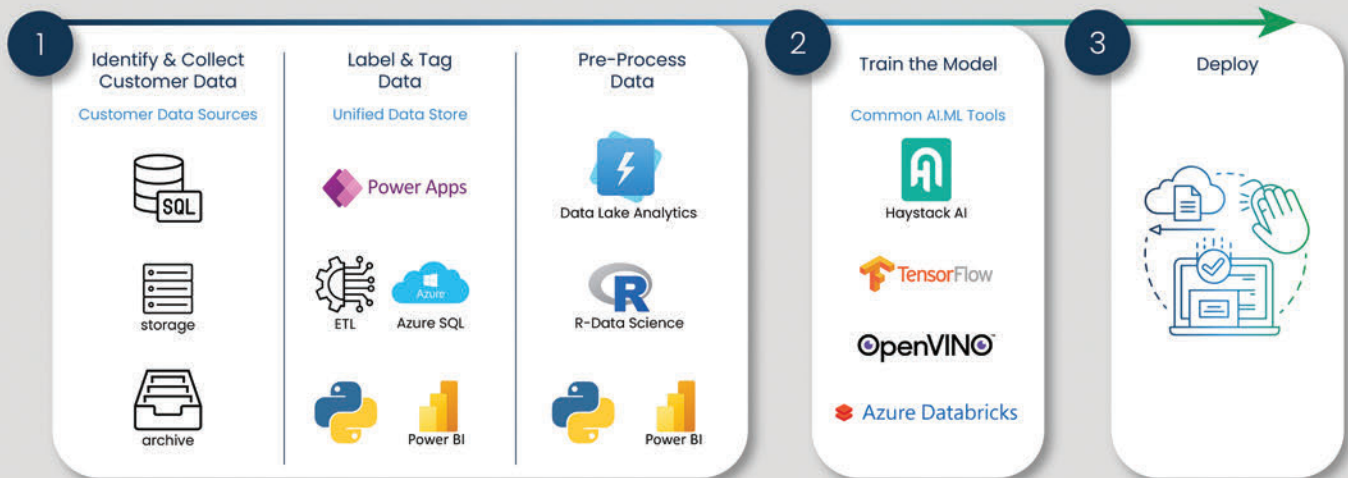

Scalable & Powerful Analytics

DataRuck's analytics platform enables automated ingest of sensor and instrumentation data, enabling access to actionable insights and creation of predictive AI-enabled reporting.

Cost Savings & Agility

DataRuck's cloud based DaaS model saves money on data storage, processing, and management costs while scaling to access more or less data as needed, improving your agility.
