Discover More About Onyx Government Services

- Successfully solving complex problems for 18+ years
- Onyx's Innovation Cell: A collaborative hub where our team of diverse minds converge to tackle complex challenges and pioneer breakthrough solutions

- Quality-driven framework, including ISO and CMMI processes to produce consistent results
- Headquartered in the National Capital Region with a satellite office in Huntsville, AL

- Top-Secret Facility Clearance
- Serving the DoD, Federal Civilian and the Intelligence Community

We pioneer solutions to complex challenges, cultivate innovation, and consistently deliver transformative results.

onyx

Federal Agencies Served

Onyx serves Federal Civilian agencies, the Intelligence Community, and the Department of Defense.
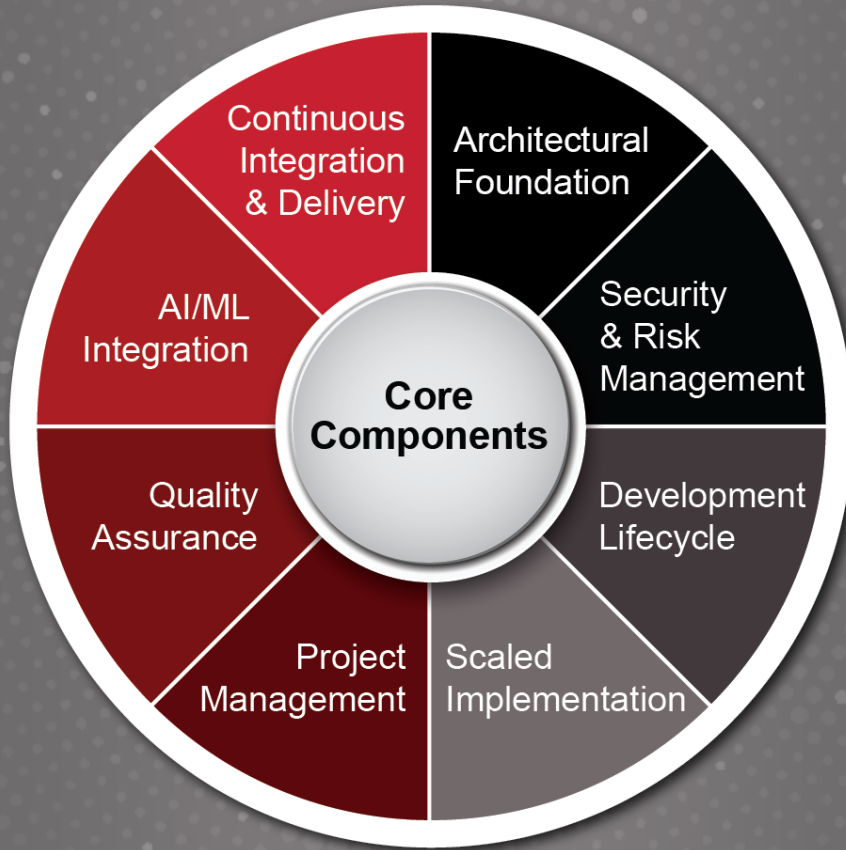

"The Onyx Way" is not just a methodology—

it's a paradigm shift in management.

This cutting-edge approach seamlessly integrates:

- **Precision**: A meticulously structured framework
- **Adaptability**: Tailored scaling to meet diverse agency needs
- **Data-Driven Decision Making**: Harnessing the full potential of analytics

- "The Onyx Way" transforms government policy-making from guesswork to precision engineering. It optimizes processes, supercharges operations, and catapults agencies into new levels of efficiency and effectiveness.

Embrace *"The Onyx Way"* and unlock the future of government performance.

Core Components

- Continuous Integration & Delivery
- Architectural Foundation
- AI/ML Integration
- Security & Risk Management
- Quality Assurance
- Development Lifecycle
- Project Management
- Scaled Implementation

Integration Principles

- Holistic Integration
- Adaptive Governance
- Technology-Driven Approach
- Modular Application
- Continuous Improvement

Benefits

- Comprehensive coverage of architecture, security, development, quality, & emerging technology aspects
- Improved interoperability & communication across different organizational domains
- Enhanced adaptability to rapid technological changes & evolving business environments
- Standardized approach that allows for organization-specific customization
- Accelerated innovation with built-in security & quality assurance
- Increased collaboration between traditional IT functions & emerging technology initiatives

Our Service Areas

Artificial Intelligence

Cloud

Cyber

Digital Transformation & Governance

DevSecOps

Artificial Intelligence

Onyx leads sector innovation, addressing complex government challenges through a unique blend of human expertise and artificial intelligence. Our skilled technologists enhance agency capabilities by implementing AI and machine learning, developing data-driven solutions for both routine and complex operations.

By partnering with federal agencies and cutting-edge technology providers, we pioneer systems that maximize data analytics potential. Our advanced solutions enable government entities to gain unprecedented insights, make informed decisions, and achieve previously impossible tasks, in a fraction of the time.

Onyx isn't just adapting to the changing landscape – we're actively shaping it, setting new standards for efficiency and effectiveness in the Department of Defense and Federal Civilian Organizations.

onyx

Cloud

Onyx Government Services leads defense technology innovation, exemplified by our transformative partnership with the Defense Information Systems Agency (DISA).

We've enhanced DISA's capabilities through the development of the DISA Storefront application, strengthening command and control in the global net-centric environment. Our comprehensive approach includes fortifying security, leveraging advanced analytics and AI, and developing custom applications. We optimize costs, streamline IT budgets, and provide scalable solutions for evolving needs. By blending deep technical expertise with industry best practices, Onyx modernizes operations and builds robust, efficient cloud infrastructures.

We empower defense agencies to not just keep pace with technological change, but to lead it, confidently tackling current and future challenges.

onyx

Cyber

Onyx stands at the forefront of government cybersecurity, serving crucial agencies like DISA and the White House Communications Agency. Our round-the-clock vigilance safeguards .mil networks and sensitive platforms through real-time analysis, incident response, and threat hunting.

We've revolutionized operations with custom processes and alert systems, while our array of countermeasures fortifies defenses against emerging threats. The Onyx Cyber Fusion team, adept at handling classified information, leads in anomaly detection and adversary tracking. Their expertise extends to VIP travel security and mobile device protection. From operational support to high-level threat briefings,

Onyx's comprehensive approach demonstrates unparalleled cybersecurity expertise across government networks, ensuring the nation's digital infrastructure remains resilient and secure.

onyx

Digital Transformation & Governance

Onyx Government Services is transforming regulatory compliance for the Alcohol and Tobacco Tax and Trade Bureau (TTB), revolutionizing oversight in the alcohol, tobacco, firearms, and ammunition industries.

Employing Agile methodologies, Onyx develops and maintains mission-critical applications, providing comprehensive development, operational support, and security measures. Leveraging advanced tools like Jira, GitLab, Jenkins, and Docker, Onyx is building a robust, scalable, and secure technological infrastructure. This suite of cutting-edge solutions enhances TTB's regulatory capabilities, streamlines operations, and sets new benchmarks for efficiency in government technology.

The Onyx-TTB partnership exemplifies innovative public sector modernization, ensuring adaptable and effective regulatory oversight for these vital industries.

onyx

DevSecOps

Onyx provides comprehensive support for the Army's Radio Frequency In-Transit Visibility (RF-ITV) program, a mission-essential information system. Our services span database administration, system administration, software engineering, and cybersecurity compliance.

We manage Oracle databases, develop web applications, and support both on-premises and cloud environments. Our robust CI/CD pipelines ensure rapid, reliable software delivery. Onyx implements Risk Management Framework, executes Security Technical Implementation Guides, and conducts vulnerability assessments. We've supported multiple Authority to Operate processes and maintain compliance with DoD cybersecurity standards.

Through performance tuning and disaster recovery planning, we ensure the RF-ITV system's availability and security for tracking global military shipments.

onyx

Prime Contracts

- **SEC (datafit)**: Analytical data services
- **Treasury (TTB)**: Alcohol and Tobacco Tax and Trade Bureau's data compilation and reporting system
- **Treasury (FinCEN)**: Financial Crimes Enforcement Network fraud analytics
- **US Navy (NAVSUP)**: Global supply chain support

Subcontracts

- **US Army (RFI-TV)**: RFID worldwide logistics network
- **DISA (Storefront)**: Web-based apps for DoD telecom
- **DISA (GSM-O)**: DoD's Information Network
- **DHS (ESOC)**: DHS Enterprise Security Ops Center
- **USTRANSCOM (IGC)**: Transportation & Logistics System
