tg FEDERAL

Your Success is Our Mission

When it comes to the US Treasury & IRS

With over two decades of expertise in Government Contracts and a track record of over 15 years supporting IT Modernization initiatives at Treasury and the IRS, TG Federal possesses a deep understanding of their complex systems and has the ability to provide teams of skilled professionals with the necessary agency experience and domain knowledge crucial for achieving success.

Key Differentiators

Specialized Delivery

Focused within the fields of Cyber, Cloud, App Dev, and Data

By engaging with clients to create a scope of work, our Subject Matter Experts on staff ensure quality candidates are presented.

Incumbent Capture Services

Offering Incumbent Capture Services, Key Personnel, Scalability

TG Federal partners with system integrators to identify key personnel and critical incumbents in advance of the bid.

Go-to-Market Strategy

Works closely with our Prime partners on targeted pursuits

Our goal is to add value by targeting key personnel, providing market intel, identifying competitors, and supplying proposal support.

Turn-Key Onboarding

Able to onboard resources within 24 hours and deploy them immediately

This allows our Prime partners the opportunity to retain their billable contract staff while they complete their internal onboarding process.

A Record of Success with the Treasury & IRS

TREASURY/OFAC

- Since 2009 TG Federal has supported modernization efforts at the Office of Foreign Assets Control (OFAC). TG currently has 8 cleared (Secret and TS.SCI) consultants supporting the development, integration, and migration of ongoing AWS cloud initiatives.

IRS – Applications Development (WebApps)

- TG Federal plays an integral role in the IRS's mission to develop and enhance Online Account Access for Taxpayers and Tax Professionals. Working across multiple service channels; Individual Online Accounts (IOLAs), Business Tax Accounts (BTAs), and Tax Pro Accounts (Tax Pro); our team (38) of developers, testers, architects, and systems engineers are dedicated to IRS's mission to improve customer service for all taxpayers.

Dept. of Treasury – Bureau of Engraving and Printing (BEP)

- Since 2010 TG Federal has supported Treasury's Bureau of Engraving and Printing (BEP)'s Manufacturing Execution System (MES) without a single gap in support. BEP serves as the Federal Reserve's currency producer and develops anti-counterfeiting technology for use in government security documents. TG Federal's service offering includes process tracking, quality management and data collection, and Oracle reporting features.

IRS - Enterprise Development, Operations Services (EDOS)

- TG Federal's commitment to pre-award efforts including incumbent capture, past performance documentation, competitive pricing, and strategy exercises resulted in being named as subcontractor (for 2 primes) on Internal Revenue Service (IRS) Enterprise Development, Operations Services (EDOS) contract, a Blanket Purchase Agreement (BPA) with a ceiling value of $2.6 billion. The multiple-award BPA has a seven-year period of performance.

Customer Account Data Engine (IRS)

- TG Federal has provided 60+ consultants over the past 9 years in support of CADE2. Support services include Solution Architecture, PMO Support, Business Analysis, Agile Transformation, IT Modernization, and Mainframe Logic Harvesting. Implementing the Service's modernization strategy to transform individual taxpayer account processing. Our team is tackling complex system integration challenges across a large multi-year program and delivering benefits to Taxpayers including: faster refunds and improved access to account information, more timely issue resolution, and enabled web and mobile capabilities.

Return Review Program (IRS)

- Supported the Return Review Program (RRP) in fostering a collaborative relationship between Business and IT, successfully cemented RRP as the system of record for individual taxpayer fraud and anomaly detection at the IRS. Leveraged Results Management Office (RMO) thought leadership to define the Future State, the Program is now well-positioned to continue to address the tax gap.

Applications Development Vision & Strategy (IRS)

- Provided strategy and visioning support to the AD executive leadership team in defining and delivering the AD Vision future state. As a subcontractor, TG Federal drove agile program management practices to implement initiatives and transform the AD organization and culture, including transforming AD from a culture of "me" to "we" through leadership sessions and executive coaching. As a result, AD saw an increased alignment with the future state vision across the organization and a new coalition of leaders to help drive the success of the organization's strategy.

Organizational Readiness (IRS)

- Identified and mitigated major people, process, and technology gaps to IRS IT program readiness by engaging stakeholders and creating forums for integration and gap resolution. As a subcontractor, TG Federal developed an SDLC-based playbook for OR services to centralize and standardize OR methodology across the IRS Business and IT - included programs such as ACA, CADE 2, FATCA, Private Debt Collection (PDC), RRP, and WebApps. OR became the gold standard at IRS for major program implementations and transformations.

Affordable Care Act (IRS)

- Delivered the design, implementation and maintenance of ACA capabilities. We demonstrated our ability to deliver enterprise-wide, transformational, mission-centric programs through our support of ACA.

Information Systems Return Modernization (IRS)

- Health Coverage Tax Credit (HCTC): Supported the implementation of the HCTC system that provides critical financial support to taxpayers impacted by job loss due to unfair foreign trade agreements.
- Individual Master File (IMF): Our mission was to modernize IMF current requirements management process and development support programs.
- Data Quality (DI): In 2016, our mission was to develop efficient new services to modernize and optimize IRS existing systems.
