#### NAICS Codes & Services:

- 518210** Data Processing, Hosting, and Related Services
- 624230** Emergency and Other Relief Services
- 541511** Custom Computer Programming
- 541513** Computer Facilities Management
- 561990** Other Support Services
- 541611** Administrative Management & General Management Consulting
- 541512** Computer Systems Design
- 561110** Office Administrative Services
- 541330** Engineering Services
- 541618** Other Management Consulting Services
- 541619** Other Computer Related Services
- 541690** Scientific and Technical Consulting Services

**CONTRACT VEHICLES  
GSA MAS 541611 & 54151S**

**FEDERAL CLIENTS**

## TECHNICAL COMPETENCIES

Kinaras manages a staff of highly experienced professionals with skills and capabilities in the following areas:

### 1. Artificial Intelligence

Generative AI | AI Testing and Benchmarking | Cloud AI Services | Machine Learning

### 2. Data Operations

Data Management | Data Engineering | Data Governance | Data Mesh/Fabric

### 3. Cloud Infrastructure

Multi-Cloud | Hybrid Cloud | Cloud Security | DevOps | Cloud Management

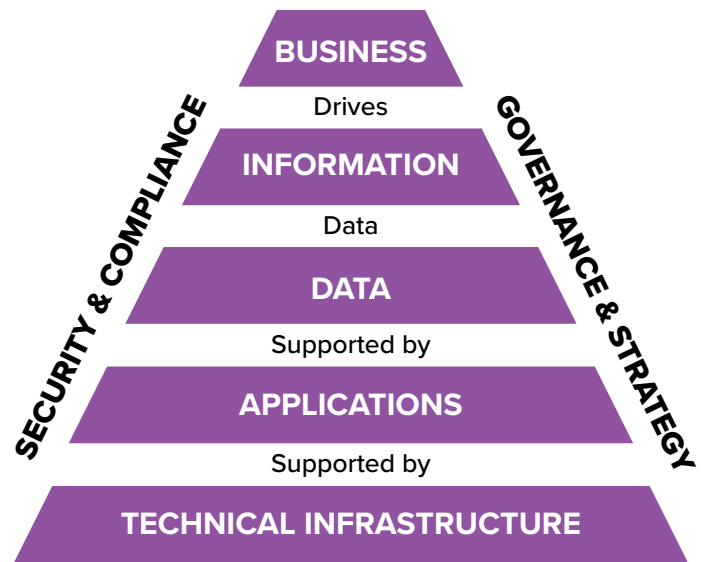

### 4. Analysis and Visualization

Spatial Analysis | Graph Analysis | Data Analysis | Dashboards & Applications

### 5. Cyber Security Operations

Continuous Monitoring | Incident Response | Access & Compliance | Risk Management

## KEY TECHNOLOGIES

We support government cloud environments and applications:

## CASE STUDY: DEPARTMENT OF NAVY

### NIWC ML OPS AT EDGE

Kinaras Solutions' machine learning engineer has participated with NIWC at Naval Applications of Machine Learning (NAML) since 2022. This relationship has led to research and presentations provided to NIWC and the NAML community on machine learning (ML) operations at Edge.

Contributions to NIWC and NAML:

- Architecture to support ML applications on unmanned underwater systems
- Hybrid cloud deployment supporting extended MLOPS
- Anomaly detection for threat identification and mitigation
- Determining enemy order of battle with MLOPS at Edge

NAML brings together experts and innovators from government, academia, and industry to explore the transformative potential of AI and ML.

NIWC Pacific established NAML in 2016 as a showcase for ML research at its labs, and very quickly grew to include partners from other Navy warfare centers and defense organizations.

NIWC Pacific now partners with the San Diego chapter of AFCEA International San Diego, and NAML serves as a forum for government, industry, and academia to share their work and learn about technical developments in the defense space.
